Introduction

Teaching learning and teaching methodology have to be adapted such that the teacher does not lose the attention of a single student. Each student has different levels of learning attitudes and ability. The report give insights of the identification and development of significant strategies and process that has been implemented to benefit both Slow and Advance Learners. G.M.D Arts ,B.W.Commerce & Science College is one of the prime institutions of this locality. Many students come to the institution to pursue higher education. But the intellectual quality of the students is not equal. Some of the students are unable to understand a topic thought by teacher while IQ of few students are very high . Therefore, departments separate the slow and advance learners in every session to help the students cope up with new learning environment. A number of measures are taken by departments, such as academic counselling, motivational talk remedial class etc. G.M.D Arts ,B.W.Commerce & Science College has Parent Teacher Association and Mentor Mentee system. Parents and teachers simultaneously interacts with the students to guide them and know their personal needs and aspirations. This helps to identify the slow learners and the advanced learners from each batch of each year and every program.

Objective -: The objective of identifying learning levels of the students is to identify the factors affecting the student's performance and analyse them with respect to the institutional framework. It also aimed to provide a proper positive solution for improving their performance and help them to build a successful career. The slow and advance learners program provide a desirable and amicable solution for the slow as well as advance learners without any discrimination between them. Strategies to identify slow and advanced learners Advanced and slow learners have been identified mainly based on the three criteria mentioned above. Each department has an individual strategy to define advanced and slow learners.

The department selects the slow and advanced learner on the basis of following criteria.

- 1) Performance in Group discussion.
- 2) Performance in pre-final examination.
