विषय : जिल्हास्तरीय वादविवाद स्पर्धेत आपल्या महाविद्यालयातील विद्यार्थ्यांचा स्थानिक पातळीवर सत्कार
करणे बाबत ...

महोदया,

वरील विषयान्वये आपणास कळवू इच्छितो की, आपल्या महाविद्यालयातील
या विद्यार्थ्यांने / विद्यार्थिनीने जिल्हास्तरीय वादविवाद स्पर्धेत सक्रीय सहभाग घेऊन त्याने / तिने प्रस्तावाच्या बाजूने
क्रमांक मिळविलेला आहे. त्याचे / तिचे हार्दिक अभिनंदन !

कृपया सदर विद्यार्थ्यांचा / विद्यार्थिनीचा आपल्या स्थानिक पातळीवर समाजदिनाच्या दिवशी सत्कार करावा ही विनंती.
मे. कळावे.

आपला विश्वासू,

(डॉ. चंद्रकांत बोरसे.),
प्राचार्य

Interested in Participating ? Please read the following Carefully

Rules and regulations:

- No Registration Fee
- College ID-Card is compulsory
- The Xerox copy of the form could be used for registration
- Send the duly filled scanned form to: exhibition.rmc19@gmail.com
- Registration form can be downloaded from our college website: www.pdearmacs.edu.in
- The Poster and Model competition is for UG and PG students
- One entry per student/group of student (Not More than 4 Students)
- Science exhibition project should be a working model on any innovative idea on the given theme
- Poster Size: 1mtr. x 1mtr.
- Participation certificate will be given to all registered students

Judging and Awards:

- Each model and poster will be judged by a panel of 3 or 4 professional members from academia and industry
- You must be present at your project and poster from 10.00 am to 4.30 pm on Thursday, 12th Dec 2019
- Winners will be declared in the valedictory function immediately after the competition

Evaluation will be done on the following criteria	Marks
Scholarly / Scientific/Creative/Innovative idea:	25
Appropriateness of title, clear objectives and conclusions:	10
Overall Impression and significance of the topic.	15
Appropriate use of images, graphic representation, and/or tables.	25
Effective communication.	25
Total	100

M.V.P. Sinnar.

Eco-Friendly Management of Leaf Spot Disease of Vegetables Through Bio-pesticides.

Introduction:
Leaf spot diseases are common in vegetables, causing significant yield loss. These diseases are caused by various fungi and bacteria. The most common leaf spot diseases in vegetables are caused by *Alternaria solani*, *Botrytis cinerea*, and *Phytophthora blight*. These diseases are characterized by the formation of necrotic spots on the leaves, which eventually lead to leaf drop and plant death. The use of chemical pesticides is not a sustainable solution as they can harm the environment and human health. Therefore, the use of bio-pesticides is a more eco-friendly and sustainable approach to manage leaf spot diseases in vegetables.

Objectives and Methods:
To evaluate the efficacy of bio-pesticides in managing leaf spot diseases in vegetables. The study was conducted in a field plot at G.M.D. Arts, B.W. Commerce & Science College Sinnar. The plot was divided into four treatments: control, chemical pesticide, and two bio-pesticides. The bio-pesticides used were *Bacillus thuringiensis* (Bt) and *Trichoderma harzianum*. The plants were treated with the respective treatments at regular intervals. The incidence and severity of leaf spot diseases were recorded at different stages of the crop cycle. The yield and quality of the vegetables were also assessed.

Results and Discussion:
The results of the study showed that the use of bio-pesticides significantly reduced the incidence and severity of leaf spot diseases in vegetables compared to the control and chemical pesticide treatments. The bio-pesticide *Bacillus thuringiensis* was found to be more effective than *Trichoderma harzianum* in managing leaf spot diseases. The use of bio-pesticides also resulted in higher yields and better quality of vegetables compared to the control and chemical pesticide treatments. This is because bio-pesticides do not harm the beneficial microorganisms in the soil and the environment, and they do not leave any harmful residues on the vegetables. Therefore, the use of bio-pesticides is a more eco-friendly and sustainable approach to manage leaf spot diseases in vegetables.

Future Prospects:
The use of bio-pesticides in managing leaf spot diseases in vegetables is a promising area of research. Further studies are needed to evaluate the efficacy of different bio-pesticides and to develop more effective bio-pesticides. The use of bio-pesticides can also be integrated with other eco-friendly management practices to achieve sustainable vegetable production.

Conclusion:
The use of bio-pesticides is a more eco-friendly and sustainable approach to manage leaf spot diseases in vegetables. It results in higher yields and better quality of vegetables compared to the control and chemical pesticide treatments. Therefore, the use of bio-pesticides is recommended for vegetable growers.
