#### ➤ Theory

- **Unit-I**

Livestock in India- association of livestock to Indian society during vedic, medieval and modern era. Demographic distribution of livestock and role in economy. Introductory animal husbandry. Common animal husbandry terms. Body conformation and identification. Dentition and ageing of animals.

- **Unit-II**

Transport of livestock by rail, road, air and on foot. Common farm management practices including disinfection, isolation, quarantine and disposal of carcass. Introduction to methods of drug administration. Common vices of animals, their prevention and care. Livestock production systems of different agro-climatic zones. Livestock resources and resources management Livestock produce and products and their availability and their role in rural/urban hearth/economy. Organic livestock production.

- **Unit-III**

General principles affecting the design and construction of building for housing for various livestock species. Selection of site. Arrangements of the building with special reference to Indian conditions. Utilization of local materials. Building materials used for construction of wall, roof and floor of animal houses, their characteristics, merits and demerits.

Demography of cattle and buffalo population. Breeds and breed descriptors of important breeds. Important traits of cattle and buffaloes. General management and feeding practices of calves, heifers, pregnant, lactating and dry animals in bulls and working animals. Draught ability of cattle and buffaloes. Raising of buffalo mates for meat production. Housing systems, layout and design of different biddings for dairy animals inducing backyard dairy and

mixed farms. Routine dairy farm operations and labor management Methods of milking and precautions. Factors affecting quality and quantity of milk production. Clean max production. Dairy farm accounts and records. Concepts of input and output cost of dairy farming (small and large holdings).

➤ **Practical**

**Lab. - Livestock Production Management-I**

1. A. Identification of various breeds of
  - a. cattle,
  - b. buffalo,
  - c. sheep
  - d. goat
- B. Familiarization with body points of animals. Approaching, handling and restraining
  - a. cattle,
  - b. buffalo,
  - c. sheep
  - d. goat
- C. Clipping, shearing, dipping, spraying and spotting sick animals.
2. A. Detection of vices. Feeding of animals. Methods of identification (marking, tattooing, branding, tagging and electronic chip).
- B. Determination of age. Determination of body weight using different measurements. Preparation of animals for show and judging. Layout plans for dairy and sheep/goat farms. Familiarization with routine farm operations.
3. A. Selection and culling of animals. Milking of dairy animals. Training of breeding mates. Detection of heat Identification and care of pregnant animals. Care of neonatal and young stock. Maintenance, cost accounting, economic analysis and preparation of balance sheet of dairy and sheep/goat farm records. Structure of wool and its differentiation from hair fibre.
4. Determination of staple length, crimps, diameter and strength of wool fibre. Sorting, packaging and grading of wool. Recovery of wax from wool. Scouring and carbonization of wool. Visit to different animal farms/ demonstration centres/ individual rural, urban

and peri-urban animal units/ wool production centres & industries/ wool, meat and animal markets.

## ❖ Animal Nutrition and Feed Technology

### ➤ Theory

#### • Unit-I

Importance of nutrients in animal production and health. Composition of animal body and plants. Nutritional terms and their definitions. Importance of minerals (major and trace elements) and vitamins in health and production, their requirements and supplementation in feed.

#### • Unit-II

Common feeds and fodders, their classification, availability and importance for livestock and poultry production. Measures of food energy and their applications - gross energy, digestible energy, metabolism energy, net energy, total digestible nutrients, starch equivalent, food units, physiological fuel value. Direct and indirect calorimetry, carbon and nitrogen balance studies.

## ❖ Animal Nutrition and Feed Technology

### ➤ Practical

1. Familiarization of various feed stuff, fodders and their selection.
2. Preparation and processing of samples for chemical analysis - herbage, faeces, urine and silages.
3. Weende's System of analysis - Estimation of dry matter, total ash, acid insoluble ash, crude protein, ether extract crude fibre, nitrogen free extract, Calcium and phosphorus in feed samples.
4. Demonstration of detergent methods of forage analysis.
5. Qualitative detection of undesirable constituents and common adulterants of feed.
6. Demonstration of laboratory ensiling of green fodders. Silage pit preparation.
7. Demonstration of conducting digestion trial in ruminants. Calculation of nutritive value of different feed stuffs in terms of digestible crude protein (DCP), total digestible nutrient (TDN), Nitrogen retention (NR) and starch equivalent (SE). Calculation of requirements of nutrients in terms of DCP, TDN and metabolisable energy (ME) for maintenance, growth,

and other types of production like meat, milk, wool, reproduction and work.

8. Formulation of rations for different categories of livestock under different conditions.

9. Demonstration of the methods for improving the nutritive quality of straws and other crop residues.

10. Formulation of rations for feeding of livestock during scarcity periods. Visit to feed factories.

### ❖ Fodder Production and Grassland Management

#### ➤ Theory

##### • Unit-I

Importance of grasslands and fodders in-livestock production. Agronomical practices for production of leguminous and non-leguminous fodders in different seasons.

##### • Unit-II

Soil and water conservation and irrigation drainage for fodder production. Farm, power and agro-energy. Farm machinery and equipment Harvesting and post-harvest techniques for fodder preservation.

##### ❖ Unit-III

Storage of feeds and fodders. Scarcity fodders. Feed and fodder management for individual animals. Fodder production for small units through inter cropping or back yard cultivation.

### ❖ Fodder Production and Grassland Management

#### ➤ Practical

1. Visit to the fodder farm. Familiarization with the various types of fodder crops utilized in the state and the samples of fodder in India.
2. Fodder cropping routines - familiarization. Collection, preservation and storage of feed and fodder; possible damages/loss and methods to prevent them.
3. Cost calculations of fodder production. Familiarizations with the back yard fodder cropping and intercropping of fodder.
4. Livestock waste utilization and recycling.
5. Calculation on the economic aspects of fodder cropping and procurement of feed.

**ENRICHING COMMUNICATIVE COMPETENCE IN ENGLISH**

**Syllabus**

**Introduction**

Language is a means to acquire education. It is a tool to express ideas, a royal vehicle of thoughts, means and method of communication, used by a community or nation. Certificate Course in **Communicative English** is designed to enhance one's language skills in English, especially with a special focus on improving speaking skills. Since English is now the international medium of expression, it is necessary to master the language to stay connected with the world.

By joining Communicative English Certificate course, students will be able to learn the elements of the language and acquire the confidence to speak fluently and write correctly in formal and informal situations. They will face no problem while communicating in schools, colleges, universities or in any public place. Because, they will learn the pronunciation of words, their meanings and to make sentences that help them to overcome speech problems in active communication. They will also learn it through interactive games, situational conversations, project works, lab sessions, etc., designed especially for those students who want to improve their communication skills for better employment opportunities.

**Objectives**

1. To enable students to master proper English pronunciation, spelling, meaning and usage.
2. To make students how to construct acceptable and correct sentences using familiar and apt vocabulary in the context of daily activities.
3. To provide students with English language skill practice to improve their

English proficiency.

4. To practice genuine English dialogues and speeches in the classroom to improve English language fluency by simulating real-life situations.
5. Using a variety of classroom and outdoor activities, conduct of workshops & seminars, assisting students to overcome their anxiety of speaking in English, in front of their classmates and teachers, thereby increasing their self-confidence.
6. To assist students to become the self-directed and autonomous English language learners.

**Outcomes of the course:**

1. To develop vocabulary and enhance grammar accuracy
2. To produce words with right pronunciation
3. To improve LSRW skills
4. To develop rapport, speak more confidently and listen intently
5. To analyze and take advantage of body language
6. To enhance students' work professionalism
