Report of Science Exhibition (2019-20)

A science exhibition was held on the 3rd of February, 2019 on the occasion of Golden Jubilee of the college wherein Students from B.Voc. Department showcased a model of ***“Integrating Farming System with Milk Production”*** which can be give the deep information of the people how to develop sustainable farming and also how actually the milk processing unit work. Our 16 students were actively participated in exhibition, and we got first price.

The “Integrating Farming System with Milk Production” model was a very unique one. Students were encouraged to develop a scientific fervor and an attitude of research mindedness so that they develop the qualities of analytical and critical thinking.
