7 Conclusion and Recommendation

Banks play very important roles in the economic development of nations as they ,to a large extent ,wield control over the supply of money in circulation and the main stimuli of economic progress .Economic development is a dynamic and continuous process which is highly dependent upon the mobilization of resources,

This has not only created an increasingly dynamic and competitive banking environment ,which calls for enhanced evaluation and analysis ,but overall ,has encouraged ,greater efficiency in banking services.

Therefore, a strong banking sector including other financial is vital for that growth, creating jobs, generating wealth eradicating poverty ,entrepreneurial activity and increasing Gross Domestic Product (GDP)growth
